Preface .....	xiii
CHAPTER 1 INTRODUCTION .....	1
CHAPTER 2 PRESENT-DAY TROPICAL RAIN FORESTS .....	8
2.1 Primary Rain Forests .....	10
2.1.1 Tropical Lowland Evergreen Rain Forests .....	10
<i>Floristic characterisation</i> .....	12
2.1.2 Semi-evergreen Rain Forests .....	14
2.1.3 Heath Forests .....	16
2.2 Coastal Vegetation .....	19
2.2.1 Mangroves .....	19
2.2.2 Beach Vegetation .....	24
2.3 Riverine Vegetation .....	25
<i>Longitudinal zonation of Sedili Besar, West Malaysia</i> .....	26
2.4 Freshwater Wetlands .....	27
2.4.1 Peat Swamp Forests .....	28
<i>Basinal peat swamp forests</i> .....	28
<i>Kerapah peat swamps</i> .....	32
<i>Watershed peat swamp forests</i> .....	32
2.4.2 Freshwater Swamp Forests .....	32
<i>Swamps of eutrophic rivers</i> .....	32
Eastern tropics .....	32
South America .....	34
Africa .....	35
<i>Swamps of oligotrophic, blackwater rivers</i> .....	37
2.5 Ecotonal Vegetation .....	37
2.5.1 Paratropical Rain Forests and the Ecotone Associated with Increasing Latitude .....	37
2.5.2 Ecotone Associated with Limiting Rainfall .....	38
2.5.3 Ecotone Associated with Increasing Altitude .....	40
2.6 Ecology Versus Palaeoecology .....	42
CHAPTER 3 GEOLOGICAL TIME FRAMEWORK, PALAEOECOLOGICAL AND PALAEOCLIMATE DEFINITIONS .....	44
3.1 Sequence Stratigraphy .....	44

3.2	<b>Time Framework</b> . . . . .	47
3.3	<b>Palaeoecological and Palaeoclimate Definitions</b> . . . . .	50
<b>CHAPTER 4 GEOLOGICAL EVIDENCE FOR RAIN FORESTS</b> . . . . .		52
4.1	<b>Flora</b> . . . . .	52
4.1.1	Plant Macrofossils . . . . .	53
	<i>Leaves</i> . . . . .	53
	Leaf size . . . . .	53
	Leaf margin . . . . .	53
	Leaf texture . . . . .	54
	Drip tips . . . . .	54
	Leaf shape . . . . .	55
	<i>Wood anatomy</i> . . . . .	55
	<i>Seeds</i> . . . . .	55
4.1.2	Plant Microfossils . . . . .	56
	<i>Pollen and spores</i> . . . . .	56
	Naming fossil pollen . . . . .	57
	Use of palynomorph names . . . . .	57
	<i>Palynological Indicators of Tropical Rain Forests</i> . . . . .	59
	Palynomorph assemblage diversity . . . . .	59
	<i>Cuticle</i> . . . . .	61
4.1.3	Geochemical Fossils . . . . .	61
4.2	<b>Terrestrial Fauna</b> . . . . .	61
4.3	<b>Lithological Indicators of Rain Forest Climates</b> . . . . .	62
	<i>Lignites and coals</i> . . . . .	62
	<i>Evaporites</i> . . . . .	62
	<i>Laterites and bauxites</i> . . . . .	62
	<i>Limestones</i> . . . . .	63
4.4	<b>Marine Fauna</b> . . . . .	63
4.5	<b>Isotope Data</b> . . . . .	63
4.6	<b>Palaeoclimate Modelling</b> . . . . .	63
<b>CHAPTER 5 EARLY ANGIOSPERM HISTORY AND THE FIRST MEGATHERMAL RAIN FORESTS</b> . . . . .		67
5.1	<b>Biogeographical Versus Geological Evidence of Angiosperm Origins</b> . . . . .	67
5.1.1	Angiosperm Ancestors . . . . .	67
5.1.2	A Tropical Origin for Angiosperms? . . . . .	69
5.1.3	Mesic or Arid? . . . . .	69
5.1.4	Origin on a Geographically Isolated 'Noah's Ark' . . . . .	73
5.2	<b>Cretaceous Angiosperm Expansion and Diversification</b> . . . . .	73
5.2.1	Cretaceous Vegetation in North America . . . . .	77
	<i>Barremian to Early Albian</i> . . . . .	77
	<i>Middle to Late Albian</i> . . . . .	77
	<i>Early Cenomanian</i> . . . . .	78
	<i>Late Cenomanian to Maastrichtian</i> . . . . .	78

5.2.2	Cretaceous Low Palaeolatitude Vegetation in Africa and South America . . . . .	80
	<i>Barremian to Aptian</i> . . . . .	80
	<i>Albian to Cenomanian, Elaterates Province</i> . . . . .	84
	<i>Turonian to Santonian</i> . . . . .	86
	<i>Campanian to Maastrichtian, Palmae Province</i> . . . . .	91
5.2.3	Cretaceous Vegetation in the Eastern Tropics . . . . .	92
	<i>Southeast Asia</i> . . . . .	92
	<i>India and Australia</i> . . . . .	94
5.3	<b>The Terminal Cretaceous Event</b> . . . . .	97
	<i>Cretaceous herbivores and diaspore vectors</i> . . . . .	97
	<i>Meteorite impact</i> . . . . .	98
	<i>Post-impact vegetational succession</i> . . . . .	98
5.4	<b>The First Megathermal Rain Forests?</b> . . . . .	99
5.5	<b>Summary of Early Angiosperm Evolution</b> . . . . .	102
<b>CHAPTER 6 SOUTH AND MIDDLE AMERICA</b> . . . . .		104
6.1	<b>Introduction</b> . . . . .	104
6.2	<b>Tectonic Setting</b> . . . . .	105
6.3	<b>Mexico and Central America</b> . . . . .	107
6.4	<b>South America</b> . . . . .	109
6.4.1	Paleocene Vegetation . . . . .	109
6.4.2	Eocene Vegetation . . . . .	112
6.4.3	Oligo-Miocene Vegetation . . . . .	117
6.4.4	Plio-Pleistocene Climatic Change and the Uplift of the Andes . . . . .	119
	<i>Coastal plains of northern South America</i> . . . . .	119
	<i>Sabana de Bogotá</i> . . . . .	121
6.4.5	Quaternary Refuges . . . . .	126
6.5	<b>Summary</b> . . . . .	129
	<i>Middle America</i> . . . . .	129
	<i>South America</i> . . . . .	129
<b>CHAPTER 7 AFRICA</b> . . . . .		131
7.1	<b>Introduction</b> . . . . .	132
7.2	<b>Tectonic Setting</b> . . . . .	132
7.3	<b>Effect of the Late Cretaceous and Early Tertiary Isolation of the African Continent on its Floristic Diversity</b> . . . . .	133
7.4	<b>Earlier Tertiary (Paleocene to Eocene) Vegetation</b> . . . . .	135
7.4.1	Paleocene to Middle Eocene . . . . .	135
7.4.2	Late Eocene . . . . .	139
	<i>Early Tertiary climates</i> . . . . .	139
7.5	<b>Mid-Tertiary (Oligocene to Middle Miocene) Vegetation</b> . . . . .	140
7.6	<b>Late Tertiary (Late Miocene to Pliocene) Vegetation and Climatic Cyclicity</b> . . . . .	146
7.6.1	Late Miocene, Alternating Expansion and Contraction of Rain Forest and Savanna . . . . .	148
7.6.2	Early Pliocene, Predominantly Moist Climates . . . . .	149

7.6.3	Late Pliocene, With Successively Drier and Cooler Climates	151
7.6.4	Reduced Diversity of Modern African Rain Forests	153
7.7	<b>Quaternary Vegetational History</b>	155
7.8	<b>Summary</b>	160
<b>CHAPTER 8 INDIA</b>		162
8.1	<b>Introduction</b>	163
8.2	<b>Tectonic History</b>	164
8.3	<b>Palaeogene Vegetation</b>	164
8.3.1	Paleocene	164
8.3.2	Early to Middle Eocene, Superwet Vegetation During Climatic Optimum	165
8.3.3	Late Eocene to Oligocene, Following the Collision with Asia	166
8.3.4	Deccan Traps	168
8.4	<b>Neogene and Quaternary Rain Forest History</b>	170
8.5	<b>Summary</b>	172
<b>CHAPTER 9 SOUTHEAST ASIA AND THE EASTERN PACIFIC</b>		174
9.1	<b>Introduction</b>	174
9.2	<b>Pre-tertiary Plate Tectonic and Climatic Setting</b>	175
9.3	<b>Paleocene to Early Eocene, Prior to the Collision of India with Asia</b>	175
	<i>Tectonic setting and palaeogeography</i>	175
	<i>Sunda region and Indochinese palynofloras</i>	176
	<i>Sahul region palynofloras</i>	180
	<i>The Philippine Plate, and Pacific floras during the Early Palaeogene</i>	180
9.4	<b>Middle to Late Eocene, Prior to Tectonic Restructuring: Dispersal from India</b>	184
9.4.1	Tectonic Setting and Palaeogeography	184
9.4.2	Middle to Late Eocene Vegetation	184
9.5	<b>The Terminal Eocene Event</b>	188
9.6	<b>Oligocene to Pliocene</b>	189
	<i>Tectonic setting</i>	189
	<i>Vegetation</i>	190
9.6.1	Mid-Tertiary, Oligocene to Earliest Miocene, Predominantly Subhumid or Monsoonal Climate Vegetation	191
9.6.2	Early Miocene to Pliocene, Predominantly Perhumid Climate Vegetation	196
	<i>Peat swamp vegetation</i>	196
	<i>Freshwater swamp forests and streamside communities</i>	198
	<i>Heath forests (kerangas)</i>	198
	<i>Dry climate phases</i>	200
	<i>Montane vegetation</i>	201
	<i>Migration routes from Asia</i>	202
9.6.3	Neogene Extension of Rain Forests into East Asia	202
9.7	<b>East Malesia and the Eastern Pacific</b>	203
	<i>Did Australian microcontinents act as 'Noah's Arks'?</i>	206
	<i>Oceanic floras</i>	206
9.8	<b>Western Sulawesi, and Dispersal across Wallace's Line</b>	206
	<i>Neogene dispersal events across Wallace's Line</i>	207

9.9	<b>Quaternary Vegetation</b> . . . . .	210
	<i>Pleistocene refuges</i> . . . . .	212
9.10	<b>Mangrove Origins and Evolution</b> . . . . .	215
	<i>Rhizophoraceae</i> . . . . .	215
	<i>Sonneratia and its lythraceous precursors</i> . . . . .	216
	<i>Other mangroves</i> . . . . .	220
9.11	<b>Summary</b> . . . . .	220
<b>CHAPTER 10 AUSTRALASIA</b> . . . . .		223
10.1	<b>Introduction</b> . . . . .	223
10.2	<b>Tectonic Setting</b> . . . . .	224
10.3	<b>Australian Early Tertiary (Palaeocene to Eocene) Vegetation</b> . . . . .	225
	<i>Paleocene</i> . . . . .	225
	<i>Early Eocene</i> . . . . .	226
	<i>Middle and Late Eocene</i> . . . . .	229
10.4	<b>Australian Mid-Tertiary (Oligocene to Early Miocene) Vegetation</b> . . . . .	231
10.5	<b>The Neogene and the Demise of Australian Rain Forests</b> . . . . .	232
	<i>Mid-Tertiary dispersals from southeast Asia</i> . . . . .	234
	<i>Survival of primitive angiosperms in Australia</i> . . . . .	234
10.6	<b>Australian Rain Forests in the Quaternary</b> . . . . .	235
10.7	<b>Ninetyeast Ridge</b> . . . . .	236
10.8	<b>New Zealand</b> . . . . .	237
10.9	<b>Summary</b> . . . . .	237
<b>CHAPTER 11 NORTHERN HEMISPHERE MEGATHERMAL RAIN FORESTS</b> . . . . .		240
11.1	<b>Introduction</b> . . . . .	240
11.2	<b>Tectonic Setting and Land Connections</b> . . . . .	240
11.3	<b>Paleocene/Eocene</b> . . . . .	241
	11.3.1 North America . . . . .	241
	11.3.2 Europe . . . . .	244
	<i>Middle and Late Eocene climatic change</i> . . . . .	248
	11.3.3 East Asia . . . . .	249
	<i>Dispersals into and between the northern hemisphere rain forest blocks</i> . . . . .	250
11.4	<b>Oligocene to Pliocene</b> . . . . .	251
11.5	<b>Summary</b> . . . . .	252
<b>CHAPTER 12 INTERPLATE DISPERSAL PATHS AND LAND BRIDGES</b> . . . . .		254
12.1	<b>Review of Palynological Evidence for Dispersal Paths</b> . . . . .	254
	<i>South America and Africa</i> . . . . .	254
	<i>Africa and India</i> . . . . .	254
	<i>India and Australia</i> . . . . .	256
	<i>South America and Antarctica/Australia</i> . . . . .	256
	<i>South America and North America</i> . . . . .	256
	<i>North America and Europe</i> . . . . .	257
	<i>India and Asia</i> . . . . .	257

<i>Africa and Europe/Asia</i> . . . . .	258
<i>West and East Asia</i> . . . . .	258
<i>Australia and Sunda</i> . . . . .	258
<i>Wallace's Line</i> . . . . .	258
<i>North America and Asia</i> . . . . .	259
<b>12.2 Dispersal Paths and 'Land Bridges'</b> . . . . .	259
<b>CHAPTER 13 SYNTHESIS</b> . . . . .	260
<b>13.1 Overview of Tropical Rain Forest History</b> . . . . .	260
<i>Areas of angiosperm origin</i> . . . . .	260
<i>Physiognomy of Late Cretaceous moist megathermal forests</i> . . . . .	260
<i>Paleocene (66–54 Ma)</i> . . . . .	262
<i>Eocene (54–36 Ma)</i> . . . . .	264
<i>The terminal Eocene event (36 Ma)</i> . . . . .	266
<i>Middle Miocene (16–10 Ma) climatic amelioration</i> . . . . .	268
<i>Neogene global climatic deterioration</i> . . . . .	270
<b>13.2 The Durian Theory of Corner, and Evolution of the Rain Forest Tree</b> . . . . .	272
<b>13.3 The Oldest Rain Forests?</b> . . . . .	273
<b>13.4 Age of Southeast Asian Rain Forests</b> . . . . .	275
<b>13.5 Dispersal of Megathermal Plants and the Antiquity of Biogeographical Patterns</b> . . . . .	275
<b>13.6 Distributions of Palms, Oaks and Dipterocarps</b> . . . . .	275
<i>Palms</i> . . . . .	275
<i>Oaks</i> . . . . .	277
<i>Dipterocarps</i> . . . . .	278
<b>13.7 The Distribution of Mangroves</b> . . . . .	278
<b>13.8 Survival of Rain Forests During Quaternary Glacial Maxima</b> . . . . .	278
<b>CHAPTER 14 THE FUTURE OF RAIN FORESTS?</b> . . . . .	281
<b>Appendix – Form–taxon names for fossil pollen referred to in the text</b> . . . . .	287
<b>Glossary</b> . . . . .	295
<b>References</b> . . . . .	299
<b>Species Index</b> . . . . .	326
<b>Subject Index</b> . . . . .	339
