

# TABLE OF CONTENTS

|          |  |    |
|----------|--|----|
| <b>1</b> | EXECUTIVE SUMMARY .....  | 9  |
|          | Sustainability .....   | 9  |
|          | Climate change .....   | 10 |
|          | Competition .....  | 10 |
| <b>2</b> | SUSTAINABILITY .....   | 13 |
|          | Energy supply .....  | 15 |
|          | Environment .....  | 17 |
|          | Economics .....  | 21 |
|          | Political challenges for nuclear .....                                   | 26 |
|          | Conclusions for sustainability .....                                     | 28 |
| <b>3</b> | CLIMATE CHANGE .....   | 31 |
|          | Sectoral and regional patterns of energy use .....                       | 31 |
|          | Climate change policies and their potential effects on electricity ..... | 36 |
|          | Nuclear challenges beyond climate change .....                           | 45 |
|          | Conclusions for climate change .....                                     | 46 |
| <b>4</b> | ELECTRICITY MARKET COMPETITION .....                                     | 49 |
|          | Energy policy issues .....   | 51 |
|          | Effects on operating nuclear plants .....                                | 54 |
|          | Effects on nuclear utility business structures .....                     | 58 |
|          | Effects on new nuclear plants .....                                      | 60 |
|          | Effects on safety and safety regulation .....                            | 66 |
|          | Plant closure and waste disposal expenses .....                          | 71 |
|          | Effects on other nuclear activities .....                                | 72 |
|          | Transition issues in moving to competitive markets .....                 | 75 |
|          | Conclusions for competition .....  | 78 |
|          | REFERENCES .....   | 81 |
