

## **Contents**

| 1.       | Introduction                                   | 0). 1 |
|----------|--|-------|
|          | About this report                              |       |
|          | Key concepts and terms in this report          | 2     |
|          | A global profile of ageing women               | 3     |
|          | The knowledge gap                              | 3     |
| 2.       | A framework for action                         | 4     |
|          | A life-course approach                         | 4     |
|          | A determinants-of-health approach              | 60    |
|          | Three pillars for action                       | 70    |
|          | A gender- and age-responsive lens              | 7     |
| 3.       | The health status of older women               | 11    |
|          | Key points                                     | 11    |
|          | Implications for policy, practice and research | 15    |
| 4.       | Health and social services                     | 18    |
|          | Key points                                     | 18    |
|          | Implications for policy, practice and research | 20    |
| 5.       | Personal determinants                          | 23    |
|          | Biology and genetics                           | 23    |
|          | Key points                                     | 23    |
| <i>y</i> | Implications for policy, practice and research | 24    |
|          | Psychological and spiritual factors            | 26    |
| 6.       | Behavioural determinants                       | 27    |
|          | Key points                                     | 27    |
|          | Implications for policy, practice and research | 30    |
| 7.       | <b>Economic determinants</b>                   | 32    |
|          | Key Points                                     | 32    |
|          | Implications for policy, practice and research | 34    |
| 8.       | Social determinants                            | 36    |
| 0,       | Key points                                     | 36    |
| 9        | Implications for policy, practice and research | 37    |
| 9.       | The physical environment                       | 40    |
|          | Key points.                                    | 40    |
|          | Implications for policy, practice and research | 42    |
| 10.      | Moving ahead                                   | 44    |
|          | Taking action                                  | 44    |
| 7 - 2    | Active ageing pillar 1: health and health care | 44    |
|          | Active ageing pillar 2: participation          | 46    |
|          | Active ageing pillar 3: security               | 47    |
|          | Building a research agenda                     | 47    |
| Dofe     | proncos  | 50    |
