	Executive summary	xii
	Introduction	
CHAPTER	1 Introduction	3
	Background to the Study	3
	International research on prevalence of violence against women	4
	Study objectives	6
	Organization of the Study	7
	Participating countries	7
	References	9
	Methods	
CHAPTER	2 Definitions and questionnaire development	13
	Definitions	13
	Formative research	16
	Development of the questionnaire	17
	Questionnaire structure	17
	Maximizing disclosure	17
	Country adaptation and translation of the questionnaire	18
	References	18
CHAPTER	3 Sample design, ethical and safety considerations, and response rates	19
	Sample design	19
	Ethical and safety considerations	21
	Response rates	22
	References	24
	Results	
CHAPTER	4 Prevalence of violence by intimate partners	27
	Physical and sexual violence	28
	Acts of physical violence	30
	Acts of sexual violence	31
	Overlap between physical and sexual violence	32
	Demographic factors associated with violence	32
	Acts of emotional abuse	35
	Controlling behaviour	36
	Women's violence against men	36
	Women's attitudes towards violence	39
	Discussion	41
	References	42

Contents *(continued)*

CHAPTER	5	Prevalence of violence by perpetrators other than intimate partners since the age of 15 years 43	43
		Physical violence by non-partners since the age of 15 years 43	43
		Sexual violence by non-partners since the age of 15 years 45	45
		Overall prevalence of non-partner violence since the age of 15 years 45	45
		Non-partner violence compared with partner violence 46	46
		Discussion 46	46
		References 48	48
CHAPTER	6	Prevalence of sexual abuse in childhood and forced first sexual experience 49	49
		Sexual abuse before 15 years 49	49
		Forced first sex 51	51
		Discussion 52	52
		References 54	54
CHAPTER	7	Association between violence by intimate partners and women's physical and mental health 55	55
		Women's self-reported health and physical symptoms 55	55
		Injuries caused by physical violence by an intimate partner 57	57
		Mental health 59	59
		Discussion 61	61
		References 62	62
CHAPTER	8	Associations between violence by intimate partners and women's sexual and reproductive health 63	63
		Induced abortion and miscarriage 63	63
		Use of antenatal and postnatal health services 64	64
		Violence during pregnancy 65	65
		Parity 66	66
		Risk of sexually transmitted infections, including HIV 66	66
		Discussion 69	69
		References 71	71
CHAPTER	9	Women's coping strategies and responses to physical violence by intimate partners 73	73
		Who women tell about violence and who helps 73	73
		Agencies or authorities to which women turn 74	74
		Fighting back 76	76
		Women who leave 77	77
		Discussion 79	79
		References 80	80

Conclusions and recommendations

Summary of findings, conclusions, and areas for further research	83
Prevalence and patterns of violence	83
Association of violence with specific health outcomes	85
Women's responses and use of services	86
Strengths and limitations of the Study	87
Areas for further analysis	88
A basis for action	89
References	89

Recommendations

Recommendations	90
Strengthening national commitment and action	90
Promoting primary prevention	92
Involving the education sector	94
Strengthening the health sector response	95
Supporting women living with violence	96
Sensitizing criminal justice systems	96
Supporting research and collaboration	97
References	98
