Customer support	6

An Overview of Adobe Photoshop

Explore state-of-the-art tools	9
Stay ahead of deadlines	13

What's New in Photoshop 7.0

Meet every challenge	15
Stay competitive	16
Work with confidence	17
Take advantage of tighter-than-ever integration	18

Chapter 1

Looking at the Work Area

Getting familiar with the work area	19
Using the toolbox	19
Using the tool options bar	21
Using the palette well (Photoshop)	22
Using tool presets (Photoshop)	22
Using palettes	23
Using context menus	28
Viewing images	28
Correcting mistakes	32
Reverting to a previous version of an image	33
Duplicating images	36

Using rulers, columns, the measure tool, guides, and the grid	37
Working with Extras	41
Displaying status information (Photoshop)	42
Displaying file and image information	42
Annotating images (Photoshop)	44
Jumping between applications	46
Previewing an image in a browser	48
Managing libraries with the Preset Manager (Photoshop)	49
Setting preferences	50
Resetting all warning dialogs	51
Monitoring operations	52
Closing files and quitting	52

Chapter 2

Getting Images into Photoshop and ImageReady

About bitmap images and vector graphics	53
About image size and resolution	54
Changing image size and resolution	57
Scanning images	61
Importing images using WIA (Windows Image Acquisition) Support	62
Creating new images	63
Opening and importing images	64
Using the File Browser (Photoshop)	68
Placing files	71
Managing files with WebDAV (Photoshop)	72

Chapter 3

Working with Color

About color modes and models (Photoshop)	77
Color gamuts (Photoshop)	82
Adjusting the monitor display	82
Channels and bit depth (Photoshop)	84
Converting between color modes (Photoshop)	85
Converting to indexed color (Photoshop)	86
Making color and tonal adjustments	86

Chapter 4

Producing Consistent Color (Photoshop)

- Why colors sometimes don't match87
- About color management87
- Do you need color management?88
- Creating a viewing environment for color management89
- Setting up color management90
- Using predefined color management settings90
- Customizing color management settings92
- Specifying working spaces93
- Specifying color management policies94
- Customizing advanced color management settings96
- Saving and loading color management settings96
- Synchronizing color management between applications97
- Soft-proofing colors97
- Changing the color profile of a document99
- Embedding profiles in saved documents100
- Obtaining, installing, and updating color profiles101
- Creating an ICC monitor profile102

Chapter 5

Selecting

- About selections103
- Making pixel selections103
- Adjusting pixel selections110
- Softening the edges of a selection111
- Moving, copying, and pasting selections and layers113
- Using the Snap command117
- Saving and loading selections118
- Deleting selections118
- Removing fringe pixels from a selection (Photoshop)118
- Extracting objects from their background (Photoshop)119

Chapter 6	Transforming and Retouching	
	Changing the size of the work canvas	123
	Rotating and flipping entire images	123
	Cropping images	124
	Transforming perspective while cropping (Photoshop)	125
	Transforming objects in two dimensions	127
	Transforming objects in three dimensions	132
	Cloning and repairing images	134
	Retouching images	138
	Using the Liquify command	140
Chapter 7	Drawing	
	About drawing and painting	147
	Drawing shapes and paths	147
	Using the shape tools	150
	Using the pen tools (Photoshop)	152
	Editing shape layers	156
	Using the Paths palette (Photoshop)	156
	Editing paths (Photoshop)	157
	Managing paths (Photoshop)	163
	Converting between paths and selection borders (Photoshop)	164
	Adding color to paths (Photoshop)	166
Chapter 8	Painting	
	Using the painting tools (Photoshop)	167
	Using the painting tools (ImageReady)	167
	Erasing	168
	Using the art history brush tool (Photoshop)	171
	Working with brushes	172
	Setting options for painting and editing tools	185
	Using the gradient tool (Photoshop)	188
	Using the paint bucket tool	193

	Filling and stroking selections and layers	194
	Creating and managing patterns	196
	Using the Pattern Maker	198
	Choosing foreground and background colors	201
	Using the Adobe Color Picker	205
	Using other color pickers	209
Chapter 9	Using Channels and Masks	
	About channels	211
	Using the Channels palette (Photoshop)	211
	Managing channels (Photoshop)	213
	Deleting channels	216
	Mixing color channels (Photoshop)	216
	Adding spot colors (Photoshop)	217
	Using channel calculations to blend layers and channels (Photoshop)	220
	About masks (Photoshop)	223
	Creating temporary masks in Quick Mask mode (Photoshop)	224
	Storing masks in alpha channels	225
Chapter 10	Using Layers	
	About layers	229
	Using the Layers palette	229
	Creating layers and layer sets	230
	Working with layered images	231
	Managing layers	236
	Setting opacity and blending options	240
	Using layer effects and styles	246
	Using adjustment layers and fill layers (Photoshop)	256
	Masking layers	259
	Creating clipping groups	264
