

Table of Contents

Dedication	x
Acknowledgements	xi
Abbreviations and acronyms	xiii
Preface	xv
1. Introduction	1
1.1 The background to this publication	1
1.2 The aim of these guidelines	2
1.3 Structure of guidelines	3
2. Background – an introduction to Category V protected areas	5
2.1 Introducing the concept of landscape	5
2.2 IUCN Protected Area Management Categories	7
2.3 Facts and figures	11
2.4 Key characteristics of Protected Landscapes	12
2.5 An approach “whose time has come”	13
3. The planning of Category V protected areas	17
3.1 Principles of Category V planning	17
3.2 Legislation for Category V protected areas	18
3.3 Selection of Category V protected areas	23
3.4 Category V, neighbouring protected areas and bio-regional planning	25
3.5 Category V protected areas and international conventions and classifications	27
3.6 Boundaries for Category V protected areas	33
3.7 Involvement of local communities and other stakeholders	35
3.8 Building public and political support	37
4. Management of Category V protected areas: Principles	39
4.1 General principles of protected area management	39
4.2 Twelve principles for the management of Category V protected areas	39
5. Management of Category V protected areas: Policies	43
5.1 General objectives for the management of Category V protected areas	43
5.2 Policies relating to the role of local people	44
5.3 Policies relating to resource use: farming, forestry and fisheries	55

5.4 Policies relating to land use planning	67
5.5 Policies relating to environmental protection and conservation	72
5.6 Policies relating to tourism, public awareness, education, information and interpretation	82
5.7 Additional policies to promote sustainable resource use	88
6. Management of Category V protected areas: Processes and plans	91
6.1 Introduction	91
6.2 Community involvement and participation	91
6.3 The Management Plan: Status, scope, form and content	95
6.4 The Management Plan: Preparation	95
6.5 Monitoring, evaluation and adaptive management	99
6.6 Programmes, plans etc. that support the Management Plan	100
7. Management of Category V protected areas: Means	103
7.1 Administration/management agency	103
7.2 The staff	105
7.3 The finances	106
7.4 Information management and IT	107
Annexes	109
1. Guidelines for Category V protected areas – Extract from the Guidelines for Protected Area Management Categories (IUCN 1994)	111
2. Suggested scope, form and content for Management Plans for Category V protected areas	113
References	119
List of boxes	
1. Why Category V approaches are well-suited to developing countries' needs	15
2. Guidelines for legislation for establishment of Category V protected areas	20
3. Some examples of national names used for Category V protected areas	22
4. Guidelines on the criteria for selecting Category V protected areas	23
5. Guidelines on the information required to select Category V protected areas	24
6. Cultural Landscapes under the World Heritage Convention	27
7. The European Landscape Convention (ELC)	30
8. Guidelines for determining the boundaries of a Category V protected area	33

9. Guidelines on involving stakeholders in planning at national, regional and local levels	36
10. Objectives of management for Category V protected areas	43
11. Additional objectives of management for Category V protected areas	44
12. Guidelines for building partnerships between different landowners and other interests	49
13. Principles and guidelines for policy towards farming in Category V protected areas	57
14. Innovative marketing of traditional agricultural products	61
15. Guidelines for forests, woodlands and trees in Category V protected areas	65
16. Guidelines for land use planning in relation to Category V protected areas	67
17. Guidelines on the suitability of small-scale development in Category V protected areas	69
18. Guidelines for determining the acceptability of large-scale development in Category V protected areas	71
19. Integrity and authenticity as they apply to the scenery of Category V protected areas	73
20. A checklist for the natural qualities and biodiversity of Category V protected areas	75
21. Guidelines for the conservation of biodiversity in Category V protected areas	76
22. Guidelines for the conservation of the built and historic heritage in Category V protected areas	78
23. Guidelines for the protection of contemporary cultural/spiritual values	80
24. The aims of sustainable tourism in Category V protected areas	83
25. Guidelines for sustainable tourism in Category V protected areas	83
26. Guidelines for capital tourism projects in Category V protected areas	84
27. Guidelines for policies for public awareness, education, information and interpretation	87
28. Sustainable approaches to energy, structures, waste and water in Category V protected areas	89
29. Co-management of protected areas	93
30. Guidelines for stakeholder involvement in Category V Protected area management	93
31. Guidelines for consultation on the draft Management Plan	98
32. Some organisational structures used for Category V protected areas	103
33. Guidelines for a managing body for a Category V protected area	104

34. Guidelines for augmenting staff capacity for Category V protected areas	105
35. Guidelines for securing additional funds for Category V protected areas	106

List of case studies

1. Brazilian legislation for Environmental Protection Areas (Category V)	21
2. UK National Parks Legislation – designed as a partnership	21
3. The Royal Chitwan National Park, Nepal – a Category V Buffer Zone	26
4. The Philippine Rice Terraces – the importance of World Heritage designation	29
5. Champlain-Richelieu Valley, USA and Canada – working across a national boundary	32
6. National Capital Greenbelt, Ottawa, Canada – landscape protection through partnership	48
7. Amboseli/Longido Heartlands, Kenya/Tanzania – a community partnership for conservation and sustainable development	48
8. Conservation areas in the South Pacific Islands – a community-based approach	50
9. Gobi Gurvan Saikhan National Park, Mongolia – a community management area	51
10. The French Regional Nature Parks – integration of economic and social objectives	53
11. Saint Lucia – using protected landscapes as a catalyst for sustainable development in rural communities in Small Island Developing States (SIDS)	54
12. Island of Öland, Sweden – support for traditional, sustainable agriculture	56
13. The work of the Farming and Wildlife Advisory Group (UK) – conservation advice to farmers	58
14. The Agri-Environment Programme of the European Union	60
15. Organic agriculture in the regional parks of Tuscany, Italy	62
16. Proposed ‘Potato Park’, Peru – protected landscape to help save plant genetic resources	63
17. Former Champion Lands, Vermont, USA – encouraging sustainability in forest management	66
18. Land use planning in the UK system of national parks	71
19. Ilha Comprida, Sao Paulo State, Brazil – land use plan to protect biodiversity	72
20. The Hortobágy National Park, Hungary – biodiversity conservation through traditional farming	77
21. Rideau Canal Corridor, Canada – historic feature as the core of a Category V protected area	79
22. Sierra Nevada de Santa Marta, Colombia	81
23. Sahyoe/Edacho, Canada – a sacred landscape	81

24. Laikipia/Samburu Heartland, Kenya – wildlife-based and tourism-financed community development	85
25. Jiuzhaigou Valley Scenic and Historic Area, China – the pressures of tourism	86
26. Tarangire/Manyara Heartland, Tanzania – education for conservation	88

List of figures

1. What landscape is	5
2. The six IUCN Management Categories of protected areas	8
3. Protected Area Management Categories and degree of environmental modification	9
4. Main differences between Categories V and VI	10
5. The world's protected areas by category and number	11
6. The world's protected areas by category and extent	11
7. A new paradigm for protected areas	14
8. Diagrammatic representation of the buffer and linkage functions of a Category V protected area	26
9. Relationship between IUCN Protected Area Management Categories and Biosphere Reserve Zones	30
10. Three international approaches to landscape	31
11. The Participation Continuum	92
12. The Management Plan cycle	96
13. The relationship between the Management Plan and other plans and strategies	100
