

Contents

1	Introduction	1
1.1	Background	4
1.2	The Projects and Themes of the Book	10
1.3	The Structure of the Book	13
2	The Perspective: The Industrial Metabolism Approach	15
2.1	Industrial Metabolism Studies	16
2.2	Different Studies of Societal Metabolism	21
2.3	Challenges for Industrial Metabolism Studies	31
3	The Development of the European “Immission Landscape”	35
3.1	Three Phases in the Development of Concern for the Environment	36
3.2	Emissions and Deposition in Europe	39
3.3	Conclusions	49
4	The Break in Trends in Western Europe: The Case of the Rhine River Basin	51
4.1	The Rhine River Basin	51
4.2	The Rhine River Study	53
4.3	Results of the Study	55
4.4	Summary of the Results	68
4.5	Explaining the Development	72
4.6	What Can Be Learned from the Rhine Example?	75
5	The Environmental Situation in the Black Triangle–Upper Silesia Region	79
5.1	The BTUS Region	80
5.2	Background to the Situation	83

5.3	The Heavy Metal Pollution Problem	91
5.4	Summary	109
6	The Future of the Black Triangle–Upper Silesia Region	111
6.1	Scenarios	112
6.2	Developments during the 1990s in the BTUS Region	115
6.3	The Future Development of the Region	120
6.4	The Scenarios of the Project	123
6.5	Assessment of Long-Term Impacts of Cadmium Loads on Agricultural Soils	144
6.6	Conclusions	152
7	Conclusions and Discussion: Problems in Environmental Transition	155
7.1	The Heavy Metal Problem in the BTUS Region	156
7.2	Comparison with the Rhine River Basin	160
7.3	Problems of and Obstacles to Environmental Transition	162
7.4	Concluding Remarks	169
	References	171
	Index	187
